EV battery recycling — Europe market diligence

Client: Helix Capital Partners · Contact: Sarah Lin · Source: Project_Brief_EV_Recycling.pdf

Edit | Draft clarification email | Approve & find experts →

✦ AI Project brief

Regenerate | Shorter

Helix is evaluating an investment in a mid-size European lithium-ion battery recycler. They need 5–8 one-hour calls with former senior operators and industry specialists to validate market size, feedstock supply (black mass), unit economics of hydrometallurgical recovery and the impact of the EU Battery Regulation. First calls requested for the week of 26 Oct.

INDUSTRY	GEOGRAPHY	CALLS NEEDED	DEADLINE
Battery recycling	EU (DE, PL, Nordics)	5–8 × 60 min	“Early next month” CONFIRM

BUDGET	CALL TYPE	COMPLIANCE	LANGUAGE
[NOT IN DOC]	Phone / video	No current employees of target	English

+ Add question

1	How big is the EU recycling market for EV batteries today, and how fast will it grow to 2030?	p.4	Edit	×
2	Where does feedstock (black mass) come from, and who controls supply?	p.4	Edit	×
3	What are typical recovery rates and costs for hydrometallurgical vs pyrometallurgical plants?	p.5	Edit	×
4	How will the EU Battery Regulation’s recycled-content targets change demand?	p.5	Edit	×
5	Who are the leading players and how are they differentiated?	p.6	Edit	×
6	What pricing do OEMs pay for recycling services, and how are contracts structured?	p.6	Edit	×
7	What are the main operational risks when scaling a plant?	p.7	Edit	×
8	How do you see the role of Asian recyclers entering Europe?	p.7	Edit	×
